SUMMARY

Currently studying a BA in Computer Science with 2+ years of experience in Business Administration and additional knowledge of running my own company. I moved to the US seeking to develop my skills and work in the technology and surfing industry (I am a Green Card resident holder), but the beginnings are always tough, so I am first looking for an entry job to get settled in San Diego for the first months. I define myself as a self-learner and dedicated worker aiming to help achieve company goals and take on more responsibility as I get deeper into my professional career.
